

## Editor's Report AGM April 13 2024

As always, there is not very much that an Editor can report that is not already known to members of a Society, from the products of the Editor's desk; for TATHS I have produced three issues of *Tools & Trades* in the past year, as normal.

I am always in need of articles, and would welcome submissions for the Summer issue, by the end of May. The Spring issue has been with members for some time now; it contained 48 pages rather than 52, and I have to repeat my plea for articles for the next (and subsequent) issues. As I commented in my last report, it seems that, for some reason, the supply of Whatsits has reduced, and I would welcome some more of these.
